Applicant CHUGAI SEIYAKU KABUSHIKI KAISHA						
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 						
2. This REPORT consists of a total o	f 5 sheets, inc	luding this cover	sheet.			
3. This report is also accompanied by						
(sent to the applicant ar	nd to the International Burea	u) a total of	sheets, as follows:			
a. Sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Ruie 70.16 and Section 607 of the Administrative Instructions).						
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.						
b. (cent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) Disc 1 readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).						
4. This report contains indications re	enting to the tollowing hours	•				
Box No. I Basis of the	report		1			
Box No. II Priority			V			
Box No. III Non-establ	ishment of opinion with rega	rd to novelty, inv	entive step and industrial applicability			
Box No. IV Lack of un	ity of invention					
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
Box No. VI Certain documents cited						
Box No. VII Certain defects in the international application						
Box No. VIII Certain observations on the international application

International application No.

PCT/JP2004/010444 Reasoned statement under Article 35(2) with regard to nevelty, inventive step or industrial applicability: Box No. V citations and explanations supporting such statement 1. Statement YES Claims Novelty (N) NO Claims YES Claims Inventive step (IS) NO 1-8 Claims YES 1-8

2. Citations and explanations (Rule 70.7)

Industrial applicability (IA)

Nichidai Shigaku (2002), Vol.76, No.5, p.425-433 Document 1:

Claims

Claims

Enzyme Microb Technol (1997), Vol.21, No.3, p.203-211 Document 2:

Claims 1 through 8

The inventions relating to claims 1 through 8 do not appear to involve an inventive step in view of document 1.

Document 1 describes antibody production cells that can produce 6.6 to 7.1mg/L of IgM antibodies by culturing mouse hybridoma cell line B cells. There is a discrepancy between the antibody production volume of the invention described in document 1 and that of the Claims 1, 3, 5 and 6 of this patent application.

Document 2 describes that a mouse hybridoma cell line Zac3, created by a fusion of a mouse myloma cell and lymphocyte cell, adjusts culture medium nutrient enhancement conditions and promotes expression such that it achieves a state in which 115 to 14,000mg/L or more of IgA from a state in which 14 to 42mg/L or more of IgA is generated.

A person skilled in the art could easily conceive of, with the aim of obtaining a large quantity of antibodies, attempting to produce the antibody-producing cells described in document 1 under the nutrient conditions described in document 2, and in so doing, this examination finds that the cells described in document 1can also produce 100mg/L or more of IgM based on the description in document 2.

Also, because using a transforming cell, a prokaryotic cell and a CHO cell are ordinary means for producing antibodies, this examination finds that they are not particularly outstanding points.

Therefore, the inventions of claims 1 through 8, given the invention in document 1, are just inventions that could be appropriately achieved by a person skilled in the art.

Supplemental Box Relating to Sequence Listing
Continuation of Box No. 1, item 2:
 With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this report was established on the basis that of:
a. type of material
a sequence listing
table(s) related to the sequence listing
b. format of material
in written format
in computer readable form
c. time of filing/furnishing
contained in the international application as filed
flied together with the international application in computer readable form
furnished subsequently to this Authority for the purpose of search and/or examination
received by this Authority as an amendment* on
In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed, or does not go beyond the application as filed, as appropriate, were furnished.
